FRONT-END DEVELOPER

Aspiring front-end developer with experience in JavaScript frameworks. Studying Literature demanded a sharp attention to semantics, form and clarity. My preoccupation with the unknown reader and how to optimally convey ideas is intimately attuned to a longstanding goal of writing efficient and thoughtful code that will meet the eyes of other programmers and help build applications that will be used by the unknown viewer. This constant and dynamic commitment to craft is what drove me to become a web developer.

TECHNICAL SKILLS

JavaScript, React, Redux, HTML5, CSS, Adobe Creative Suite
